Dual 200A / Split 400A Transfer Switch

new for 2011!

One Plus One Equals One

The new Dual 200 Amp Transfer Switch/Split 400 Amp replaces the need for two 200 amp transfer switches in standard split 400A service homes with two 200A distribution panels. It's a convenient and affordable solution to manage whole house backup power for larger homes and businesses.

First In Its Class – Never seen before automatic transfer switch technology only compatible with Generator Systems by GE.

Easy Installation – The system uses one less transfer switch requiring less wiring, less time and expenses than typical installations. Plus factory pre-wired generator power distribution inside the transfer switch simplifies installation.

Smaller Footprint – Combining two automatic transfer switches into one, the Dual 200 Amp Transfer Switch/Split 400 Amp results in a smaller, cleaner looking installation for your customer.
